## Summary

I have over 5 years of experience in web technologies. Working with computers has always been my passion. I love developing small applications, as well as designing and implementing applications from the ground up, with different languages and the latest technologies. In recent years I have been developing on Android.

Always been interested in large projects that give "fight", because I like to solve problems and create targeted and effective solutions, I strive for simplicity, because I want to succeed at what I do.

## Education
